PROJECTS

Charity Portal

Joint project with General Assembly UX class and WDI class. We worked as a six person developer team to build out given specs and mockups. I took lead on front-end and guided creation of boilerplate HTML and global CSS files. I also built a component for appending search results retrieved from an AJAX call using jQuery.

UX Circuit Project - Easy Book

For a solo project, I researched issues around flight booking, built out a persona, conceptualized and prioritized features, conducted user testing, and prototyped a product for streamlining the process of booking flights.

EXPERIENCE

Law Office of Buck McKinney

Associate Attorney

March 2015 - October 2016
